Parth Overseas
Mumbai.

Subject:-Cankit Trials

Respected Sir/Madam,

This is to Certify that non-Invasive (Urinary analytical test kit) Diagnostic Screening test using CANKIT was Conducted on 99 Patients Suffering From Cancer & in 96 patients with no Cancer [Control]

The Finding As Under:-

I]Pre & Post Treatment (Including palliation) Cases:-

Pre Treatment Cases:-195

Post Treatment Cases :-Nil

II] No Of False positive & False negative test, out of the total Screened :-Nil

III] No of Negative results In Patients who were Screened:-

All Patients who were not known to have any cancer [Healthy Volunteer people who were Screened in Preventive Oncology Dept]. In Them The Cankit Test was Negative.

Thanks & Regards,

Vikas

Dr. Vikas Gosavi
Surgical Oncologist
